

Suction pad holder/receiver

Product code: Pad01

Overview

The suction pad holder/receiver is designed for use with the Skipper XS unit and can both hold the unit in place and receive its tape end clip. It can also be used as a receiver clip for the standard Skipper unit, and as a support for the Skipper recycle bins and safety dispensers. Simply position the suction pad onto a glass or high gloss surface and pull down the arm for an extremely strong connection.

Key selling points

- Holds the Skipper XS unit via its connector points or receives any Skipper tape end clip
- Perfect for attaching to high gloss surfaces and glass

Key features

- Has a suction cup which provides a strong attachment to high gloss surfaces/glass
- Very easy to attach and release via its handle, which also acts as a receiver

Depth: 62mm 2.4"	Weight: 190g 6.7oz

The suction pad can hold the Skipper XS unit, or receive any Skipper tape end clip.

Available stock colours

Orange Black

Product FAQs

Q. How strong is the suction cup?

A. The suction cup provides a very strong attachment to high gloss surfaces and glass, and is therefore more than secure enough to hold the Skipper XS unit in place and pull out its tape.

Q. Is there a risk of damaging surfaces?

A. The suction pad holder/receiver is safe to use on high gloss surfaces and glass. It may leave marks on glass, which will wipe off easily. It is very important, however, to release the handle fully before removing from a surface. We strongly recommended that you do not use the suction pad holder/receiver on painted surfaces, as this could cause damage on removal.
